RE: FINAL ANTIDUMPIN DUTY DETERMINATION OF OSCILATING FANS  
AND CEILING FANS FROM THE PEOPLE'S REPUBLIC OF CHINA  
(A-570-205) (A-570-206)

1. The Department of Commerce published on October 25, 1991 its final determinations of sales at less than fair value regarding oscillating fans and ceiling fans from the PRC.

2. Imports covered by these investigations constitute two separate classes or kinds of merchandise: (1) oscillating fans; and (2) ceiling fans.

Oscillating fans are electric fans that direct a flow of air using a fan blade/motor unit that pivots back and forth on a stationary base ("oscillates"). Oscillating fans incorporate a self-contained electric motor of an output not exceeding 125 watts.

Ceiling fans are electric fans that direct a downward and/or upward flow of air using a fan blade/motor unit. Ceiling fans incorporate a self-contained electric motor of an output not exceeding 125 watts. Ceiling fans are designed for permanent or semi-permanent installation.

Window fans, industrial oscillating fans, industrial ceiling fans, and commercial ventilator fans are not included within the scope of these investigations.

Furthermore, industrial ceiling fans are defined as ceiling fans that meet six or more of the following criteria in any combination: a maximum speed of greater than 280 revolutions per minute (RPMs); a minimum air delivery capacity of 8000 cubic feet per minute (CFM); no reversible motor switch; controlled by wall-mounted electronic switch; no built-in motor controls; no decorative features; not light adaptable; fan blades greater than 52 inches in diameter; metal fan blades; downrod mounting only--no hugger mounting capability; three fan blades; fan blades mounted on top of motor housing; single-speed motor.

3. Oscillating fans are provided for under HTS subheading 8414.51.0090. Ceiling fans are provided for under HTS subheading 8414.51.0030. The HTS subheadings are provided for convenience and Customs purposes. The written description remains dispositive as to the scope of product coverage.

4. For further reporting purposes these cases have been assigned investigation number A-570-807. This number should be used when dealing with the Department of Commerce only. The Customs identification numbers (see below) are to be used for Customs identification purposes and blue line reports.

5. It should be noted that in these determinations, we found no

dumping or de minimis margins for oscillating fans of Durable Electrical Metal Factory (Durable) and Polaray Industrial Corporation (Polaray), and ceiling fans of Shell Electrical Manufacturing Company (Shell) and Xinhui Electric Motor Factory (Xinhui). Therefore, you shall terminate the suspension of liquidation on entries of oscillating fans by Durable and Polaray, and ceiling fans by Shell and Xinhui. In addition, you should release any cash deposits or bonds posted on entries of these products made prior to these determinations.

In addition, the U.S. Customs Service shall suspend or continue to suspend liquidation of all entries of the following manufacturers, producers and exporters that (except for those with 0% or de minimis margins) are entered or withdrawn from the warehouse, for consumption on or after October 25, 1991, and shall require a cash deposit or posting of a bond equal to the estimated final margin percentages listed below:
